

DateView™

The Easy Way
To Plan Your Day.

DateView is the easy way to plan your day.

DateView™ lets you see your schedule in many shapes or formats with one click of your mouse. Look at a single day, your five-day work week, a regular seven-day week or five weeks at a glance.

Intuitive windows make it easy to use.

DateView's main window resembles a calendar or a page of an appointment book. Click and drag to set aside a block of time. A dialog box appears that lets you enter notes about the event, assign it a category, type, block of time and priority; specify how and when to be reminded of the event; and, if needed, set the reminder to reappear on a regular basis (such as daily, Mon.-Fri., weekly).

To see the fine details, you can view each day on an hour-by-hour basis. Arrows allow you to scroll forward and back to locate the time period you need.

For a broader view, you can view by the work week, two weeks, five weeks or you can create new views showing the days of the week that are meaningful to your schedule.

Sometimes paper is better.

When you are away from your desk and your computer, you can still carry your appointment information with you. DateView gives you several printing formats so you can easily add pages to your paper-based appointment book.

- The "Reminder" feature helps you remember meetings, appointments, phone calls - any event or date. You can even "Snooze" an event for later

- Create your personal calendar to integrate with your work calendar by using categories
- Set reminders to pay bills, return library books and to mail birthday cards or to buy presents
- Print weekly schedules for home or office so everyone knows what's going on
- Track your schedule and your boss' schedule in one calendar. DateView will let you print your schedule, the boss' schedule, or both

System Requirements

- Macintosh® Plus (Classic II or greater recommended)
- System 6.0.7 through OS 9, 2 MB RAM
- Hard Drive required

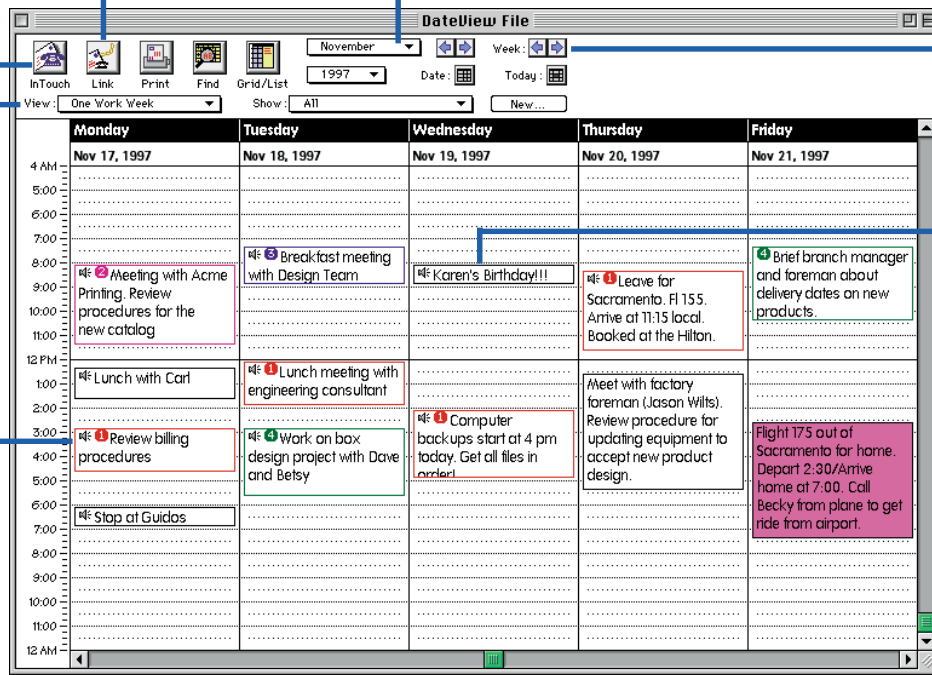

Click here to attach an InTouch record to your appointment

Need to see next year? Last year? Next month? Click here!

One click here and you go directly to InTouch

Change your views with the pop-up menu

Event priority is indicated for each item

Change your week view easily, forward or backward

Recurring events are easy to set up

Also from the Prairie Group:

InTouch^{With...}

Keep track of names, addresses, phone numbers and up to 14 pages of notes on any name or item in your address book. InTouch has no predefined order or entry method so it's easy to learn and easy to use. InTouch will print out as address books/planners, labels or envelopes. Check out InTouch and control your data! (For Mac OS)

DiskTop

Still the best way to locate, copy, move, delete or rename files. This great Mac OS file management utility is a legend. You'll never lose a file again. You can clean up duplicates, change a file's type or creator and more with DiskTop. (For Mac OS)

In/Out™

You've seen those cute little in/out boards at the front desk? That's exactly the function In/Out performs ... except it does it on your Mac OS network. Check in and out and see who's where from your desktop. No more searching or wondering or wasting time. Try it in your office and you'll wonder how you ran a business without it. (For Mac OS)

CalendarMaker

Create cool, colorful, informative calendars for any month, any year (past or future). CalendarMaker is the ideal way for business, schools, clubs, churches and more to keep people informed about events and activities. CalendarMaker is an easy-to-use graphics application that can be used to create presentation-quality calendars in minutes. (For Mac OS)

QuickConference™

Solves the communication problems businesses face each day within the office. Everyone in your company can discuss important issues and answer questions within minutes, not hours. Best of all, unlike other instant messaging products, QuickConference

can be used by organizations with, or without, a connection to the Internet. (For Mac OS & Windows)
